SPBR is an architecture office established in São Paulo, Brazil. It was founded in 2003 by Angelo Bucci.

For over 25 years, Angelo Bucci has been dedicated to building design, sharing his time between both professional and academic duties. These parallel activities define a special approach to SPBR projects, in which the professional demands are understood as an engaging opportunity to research and speculate new ideas.

Our projects highlight the importance of structural accuracy and distinctness, construction viability, transparency, and most importantly, a comprehension of the urban space as a democratic experience.

SPBR has been working worldwide with a great variety of projects on different scales and programs: apartment buildings, schools, cultural centers and multiple competitions. For each work, we activate our professional and academic network in order to gather the best expertises according to the design requirements.

## **Angelo Bucci**

Born in Orlandia – SP, October, 17th, 1963
