

# Very Dodgy Statements on Architecture

V.O. D-20

1. Architecture should be considered, neither as extension of man nor dissociated body.
2. Large-scale architecture is much more territorial than physical, although we lost dimension and scale.
3. Criteria for accessibility can no longer be based on human body or its scale and activity.
4. In an ideal world, architecture is able to disappear.
5. There is no utopia as long as architecture can observe or trigger human movement.
6. Programmatic process of architecture should rarely have an error, and that barely.
7. Individual re-interpretation of architecture is useless, so does context.
8. Using state-of-the-art technology merely produces state-of-the-technology architecture.
9. Technology cannot inhabit architecture.

Bernard Tschumi

“ The football player skates across the battlefield ”

**"Any relationship between a building and its users is one of violence,  
for any use means the intrusion of a human body into a given space,  
the intrusion of one order into another."**

**Space. Event. Program.  
Disjunctions. Non-sense/No Meaning.**

...

(INTERSECTION REPETITION QUALIFICATION DISTORTION FRAGMENTATION)

1. WALLS AND INTERIOR PLANES (SOLID WALLS, CURTAIN WALLS, TRELLIS) CAN BE COMBINED ACCORDING TO SPECIFIC RULES (INTERSECTION, REPETITION, QUALIFICATION, DISTORTION, FRAGMENTATION)

2. A TYPOLOGY OF POSSIBLE SURFACES AND CONFIGURATIONS AT THE USERS DISPOSAL

1. Why did many others use technology to prove (B) again?
2. Did Bernard Tschumi need (C) level technology?
3. Can (C) level ever be independent from technology?

Bernard Tschumi

Architecture and Disjunction

Sources and Acknowledgments	viii
Introduction	2
<b>I Space (essays written in 1975 and 1976)</b>	<b>25</b>
The Architectural Paradox	27
Questions of Space	53
Architecture and Transgression	65
The Pleasure of Architecture	81
<b>II Program (essays written between 1981 and 1983)</b>	<b>99</b>
Architecture and Limits	101
Violence of Architecture	121
Spaces and Events	141
Sequences	153
<b>III Disjunction (essays written between 1984 and 1991)</b>	<b>171</b>
Madness and the Combinative	173
Abstract Mediation and Strategy	191
Disjunctions	207
De-, Dis-, Ex-	215
Six Concepts	227
Notes	260

# Programmability

De-, Dis-, Ex-  
De-constructivism vs. De-coupling  
De- vs. Double-

Programming and Distanciation  
Technology and Defamiliarisation

...

**Crossprogramming:** Using a given spatial configuration for a program not intended for it, that is, using a church building for bowling. Similar to typological displacement: a town hall inside the spatial configuration of a prison or a museum inside a car part structure. Reference: crossdressing.

**Transprogramming:** Combining two programs, regardless of their incompatibilities, together with their respective spatial configurations. Reference: planetarium + rollercoaster.

**Disprogramming:** Combining two programs, whereby a required spatial configuration of program A contaminates program B and B's possible configuration. The new program B may be extracted from the inherent contradictions contained in program A, and B's required spatial configuration may be applied to A.

# Accessibility

Violence of Architecture  
Bodies violating Space  
Space violating Bodies

Technology for accessibility is already full?

1. Why did many others use technology to prove (B) again?
2. Did Bernard Tschumi need (C) level technology?
3. Can (C) level ever be independent from technology?
