*The cities like the houses. The houses like the cities.*

Vilanova Artigas, 1969

A trip to explore the radical urban experiments of modern and contemporary architecture in São Paulo.

By drifting through the city, we will experience the culture of reinforced concrete, tectonic expressivity and spatial generosity that was forged in that context.

We will visit projects by Vilanova Artigas, Paulo Mendes da Rocha, Oscar Niemeyer, Lina Bo Bardi, Angelo Bucci, among others

Number of students: max 30

Price Range: F
